

LINN KLIMAX DS – THE FUTURE OF MUSIC

The Linn Klimax DS digital music player is the first authentic hi-fi product to stream digital music over a standard home network, and sets nothing less than a new, previously unattainable performance standard.

The Klimax DS is a ground breaking product with the performance to transform hi-fi industry perceptions and possibilities in the same way as the Linn Sondek LP12 did 35 years ago, and completes the Linn Klimax System - the ultimate manifestation of precision engineered musical performance and beauty.

"...I don't think I've ever heard better from a digital source. The results were magical... Impeccably engineered, built and voiced, this is a landmark high end digital product."
